

Welcome to the Black Prong Trail Explorer's Club!

We are excited to bring you curated trail experiences in our neighbor, the Goethe State Forest. We have put together some GPS-guided routes in the Goethe for you to explore by hiking, trail riding, carriage driving, or cycling. Follow the instructions below to sign up!

First click the link included in your email or scan the QR code.

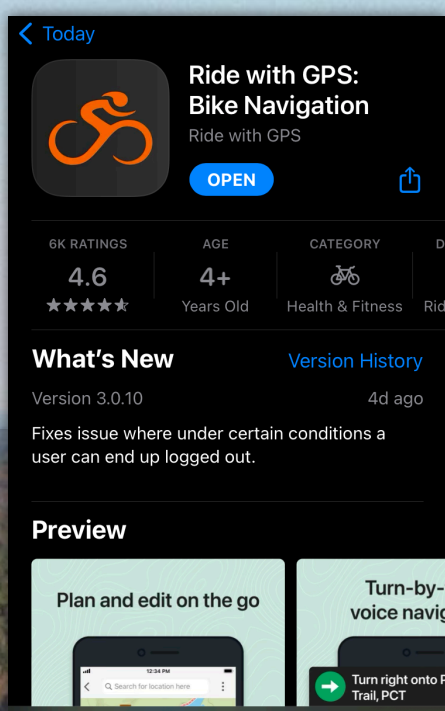

You will see a screen like this. Click Sign Up if you do not already have a Ride with GPS account.

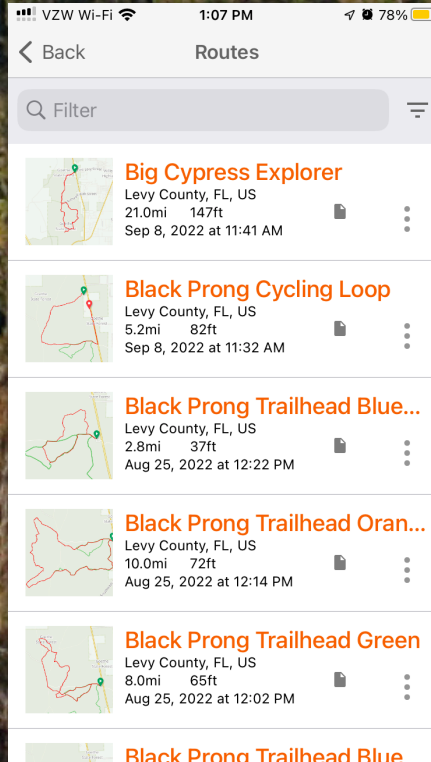

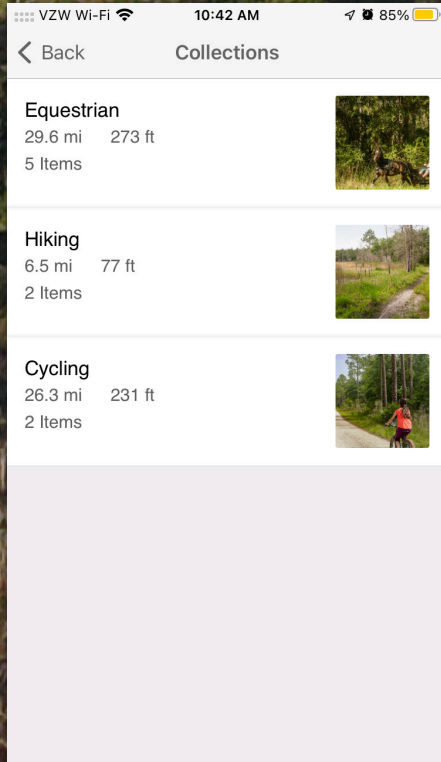

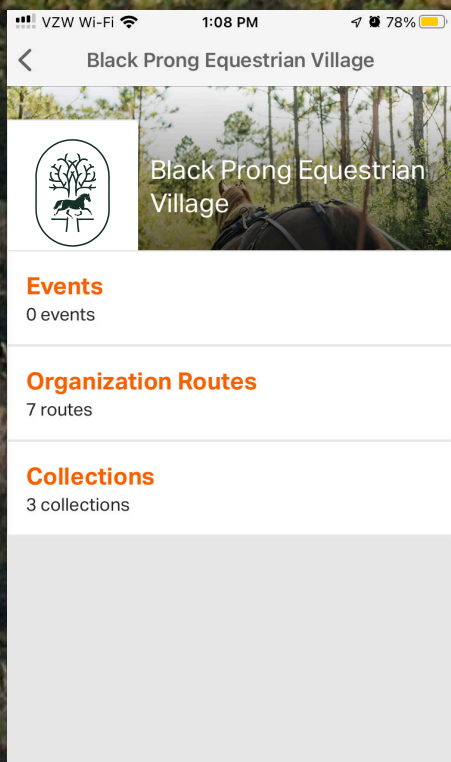

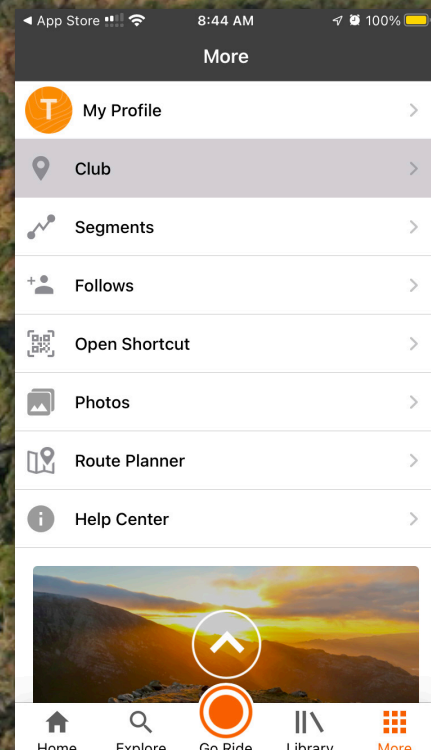

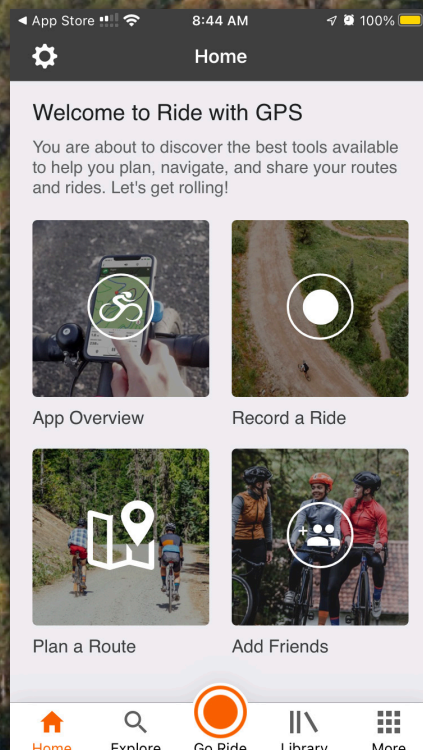

Create an account with your preferred email, then download the Ride with GPS app.

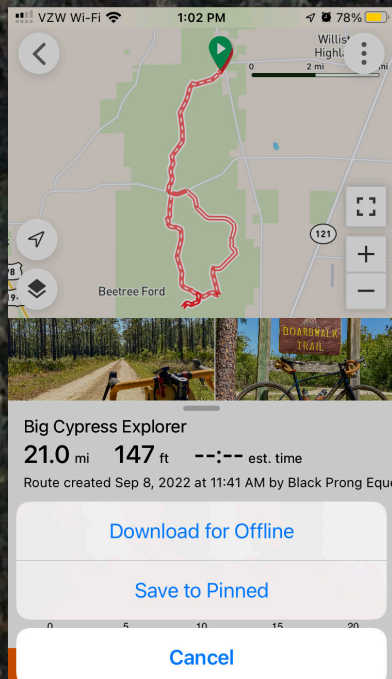

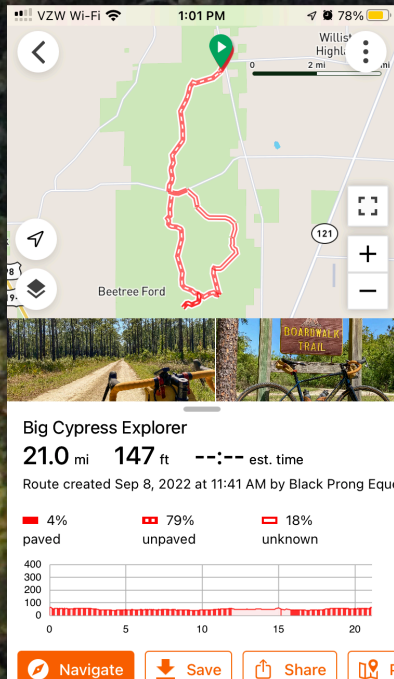

The app looks like this! Once downloaded, sign in to your new account using your new credentials!

From the Home screen, Click "More" on the bottom right, then select "Club" to access the Black Prong Club page.

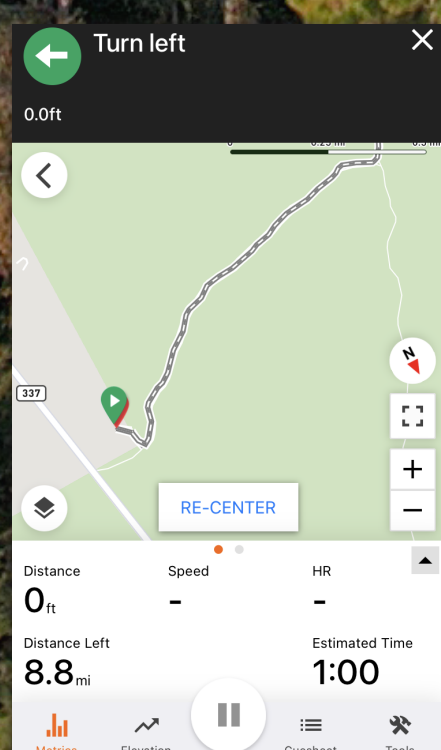

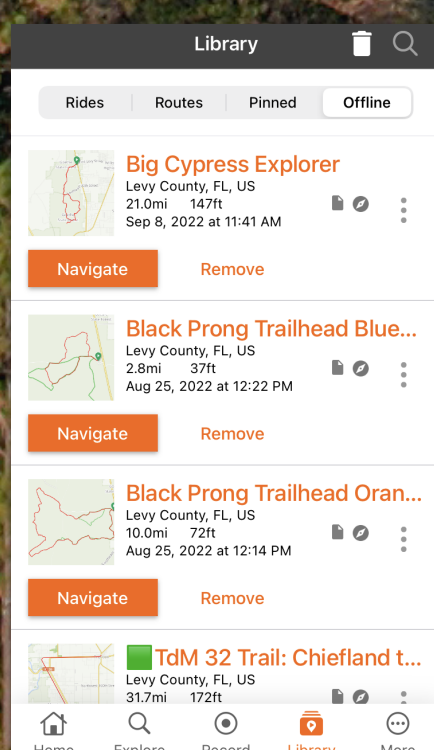

Here you can view all our routes and collections. Collections show the routes grouped by type: those recommended for hiking, cycling or equestrian use. Review and select a route to try.

Once selected, click save and then "Download for Offline." Make sure to do this before you leave the property while you have internet access!

Now that your new route has been downloaded, you can find your offline routes under the "library" tab at the bottom. Make sure you click over to "offline" routes at the top.

Pay attention to where the departure point is located, once you are there, click "Navigate" on your route, and enjoy!
